NATURE STUDY

- DISCOVER NATURE THROUGH ART -

01 | Go on a nature walk

You can go to a local park, wander around your city, or go on a hike. Write down a list of everything you see, hear, smell, etc. Embrace all of your senses! Write down everything you see from big to small.

02 | Choose one object

What are you drawn to the most? Pick one object you found on your nature walk that grabs your attention the most. Pick it up (if it's safe to touch), describe it, sketch it, make little notes. Start adding details and drawing different variations or angles of your collected object.

03 | Create a final piece

After spending time making our observations, we want to create our final piece. Does this object bring up any feelings or memories? Maybe that will influence or inspire your final piece. When you're finished, you can add the date, location, weather, and other details to your "nature observation."
